ABSTRACT : PROBLEM TO BE SOLVED: To set a parameter by a selection system using a pointing device such as a mouse or the like and to substantially improve operability.

SOLUTION: When the browser of WWW is connected to a network scanner server part 3 using an HTTP protocol through a network 2, the parameter setting image 6 of a form set beforehand on a browser side is displayed. Also, in the state, the pointing device such as the mouse or the like is operated, the respective kinds of the parameters of a resolution, a paper size, an image format, as to whether or not image data are stored, the presence/absence of the use of a clickable map, etc., are set and then, when a scanning button is pressed, this network scanner 1 is operated based on the contents of the parameters set on the parameter setting screen 6.
